Training Parameters

Sector	Environmental Science
Sub-Sector	Sustainability
Occupation/Area of field	Environmental Compliance
Country	India
NSQF Level	6 (Micro credential)
Aligned to NCO/ISCO/ISIC Code	NCO-2015/1213.9900
Minimum Educational Qualification and Experience	Pursuing first year of 2 years PG program after completing 3 year UG degree in (Maths/Chemistry/Physics/Management/Commerce/Economics) OR Pursuing 4th year UG degree in Engineering/Maths/Chemistry/Physics/Economics/Commerce(honours)and continuing education OR Completed 4year UG degree in Engineering/Maths/Chemistry/Physics/Economics/Commerce(honours) OR Completed 3-year UG in (Maths/Chemistry/Physics/Management/Economics with 3 year of Relevant experience in management/consultancy/research in sustainability, circular economy, etc. OR Previous relevant Qualification of NSQF Level 5.5 with 1.5 years of Relevant experience OR Previous relevant Qualification of NSQF Level 5 with 3 years of Relevant experience
Pre-Requisite License or Training	NA
Minimum Job Entry Age	20 years
Last Reviewed On	31.01.2024
Next Review Date	30.01.2027

NSQC Approval Date	31.01.2024
Micro-credential course Version	1
Model Curriculum Creation Date	31.01.2024
Model Curriculum Valid Up to Date	30.01.2027
Model Curriculum Version	1
Minimum Duration of the Course	4 days (30 Hours)
Maximum Duration of the Course	4 days (30 Hours)

Program Overview

This section summarizes the end objectives of the program along with its duration.

Training Outcomes

At the end of the program, the learner will be able to:

Outcome 1: Discuss the fundamentals of climate change science and the international legal and policy framework for climate change.

Outcome 2: Assess and quantify greenhouse gas emissions from business operations and other organizational activities.

Outcome 3: Measure a company's carbon footprint and manage its climate performance.

Outcome 4: Write sustainability reports that meet regulatory requirements and effectively communicate a company's sustainable performance.

Outcome 5: Understand the Business Responsibility and Sustainability Reporting (BRSR) framework, including its scope, reporting principles, and disclosure requirements.

Outcome 6: Compare the BRSR framework with other sustainability reporting frameworks and standards.

Outcome 7: Identify different sources of climate change finance.

Outcome 8: Analyze principal challenges and opportunities for climate change action.

Outcome 9: Outline basic elements of planning processes to implement climate change actions.

Compulsory Modules

The table lists the modules, their duration and mode of delivery.

NOS and Module Details	Theory Duration	Practical Duration/Examination/Study material/Recorded videos	On-the-Job Training Duration (Mandatory)	On-the-Job Training Duration (Recommended)	Total Duration
SGJ/MCr-0001: GHG Accounting and Sustainability Reporting MCr Version No.1 NSQF Level 6 Credits: 1	20:00	10:00			30:00

Module 1: Introduction to the Climate Challenge and Policy Action	07:00	00:30			07:30
Module 2: Greening Businesses through Aligning Policy and Action	05:00	02:30			07:30
Module 3: Greenhouse Gas Emissions and Accounting: Scope 1, Scope 2, and Scope 3	04:00	03:30			07:30
Module 4: Business Responsibility and Sustainability Reporting (BRSR)	04:00	03:30			07:30
Total Duration	20:00	10:00			30:00

Module Details

Module 1: Introduction to the Climate Challenge and Policy Action

Mapped to: SGJ/MCr-0001 GHG Accounting and Sustainability Reporting, v1.0

Terminal Outcomes:

- Understanding Climate change and climate variability
- Challenges and opportunities in climate change action

Duration: 07:00 hours	Duration: 00:30 hours
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
• Describe the fundamental concepts of climate change science. • Explain the concepts of the greenhouse effect, global warming potential, greenhouse gases and causes of anthropogenic climate change. • Describe observed and expected climate trends along with various climate scenarios. • Explain the social and economic impacts of climate change • Discuss climate mitigation and adaptation and their significance • Discuss International and national Policy Framework and actions on Climate Change • Describe the role of UNFCCC for driving global climate actions • Explain how to assess climate risk • Analyse principal challenges and opportunities for climate change action and describe the significance of low-carbon development • Discuss key international mechanisms that support low-carbon development • Describe the role and the landscape of climate finance. • Identify important sector and industries for adopting low-carbon actions and outline various measures • Describe the necessity of incorporating climate change into national planning procedures. • Describe the functions of local, regional, and national institutions in climate change planning and actions.	• Outline the science of climate change • Illustrate the expected consequences of climate change and the importance of mitigation and adaptation. • Illustrate climate change trends and analyse various scenarios • Illustrate key International and national Policy Framework and actions on Climate Change • Analyse key case studies on climate change actions. • Analyse the significance of low-carbon development and outline relevant strategic and policy frameworks. • Outline basic elements of planning processes to deliver climate change action at national and sub national level • Illustrate the role of various stakeholders including Government, Industry, business, civil society, etc in addressing climate change at global, national and sub national level. • Outline the main methods for assessing climate risk. • Illustrate the role of climate change financing for climate action

Classroom Aids

White boards, projectors, marker pens

Tools, Equipment and Other Requirements

1. Access to a computer or laptop with internet connectivity
2. Microsoft Office suite (Word, Excel, PowerPoint)
3. Climate data analysis software
4. Access to online climate change databases and resources
5. Web conferencing software for virtual discussions and presentations (e.g., Zoom, Google Meet, Microsoft Teams)

Module 2: Greening Businesses through Aligning Policy and Action

Mapped to: SGJ/MCr-0001 GHG Accounting and Sustainability Reporting, v1.0

Terminal Outcomes:

- Explain the importance of Policy Alignment with business action
- Describe how to mainstream climate planning with development priorities

Duration: 05:00 hours	Duration: 02:30 hours
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
• Identify global programs that assist nations in preparing for climate change. • Outline important components of the 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change, and understand how climate action fits into the larger context of sustainable development. • Explain Greenhouse Gas (GHG) emissions accounting and identify the data needed to conduct a greenhouse gas inventory for various sectors, such as corporate, finance, renewable energy, etc. • Describe the factors that make data sources suitable for the inventory, including accuracy, reliability, and relevance. • Describe approaches for gathering existing data, generating new data, and adapting data to meet the needs of the inventory	• Illustrate the future of fossil fuels in a carbon-constrained world • Assess the important role of technological innovation, policy action and financing and in addressing climate change • Analyse the trends of greenhouse gas emissions and their potential impact business and industry • Analyse the process for GHG emissions accounting and Greenhouse Gas Inventory Development & management • Show how to map a greenhouse gas inventory for an organization or project • Show how to identify emission sources and collecting data • Show how to calculate emissions using appropriate methodologies
Classroom Aids	
Laptop, white board, marker, projector, charts	
Tools, Equipment and Other Requirements	
1. Access to a computer or laptop with internet connectivity 2. Microsoft Office suite (Word, Excel, PowerPoint) 3. Web conferencing software for virtual discussions and presentations (e.g., Zoom, Microsoft Teams)	

Module 3: Greenhouse Gas Emissions and Accounting: Scope 1, Scope 2, and Scope 3

Mapped to: SGJ/MCr-0001 GHG Accounting and Sustainability Reporting, v1.0

Terminal Outcomes:

- Explain GHG Inventory Management
- Show how to identify and assess emission reduction opportunities

Duration: 04:00 hours	Duration: 03:30 hours
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
• Discuss how to Identify various sources of GHG emissions from different sectors and understand the importance of accurate source identification in GHG accounting. • Discuss the role and process of carbon footprinting • Explain different GHG emission calculation methodologies and be able to implement them in practice. • Discuss how to Choose appropriate emission factors, global warming potential values, and calculation tools for accurate and reliable GHG emission calculations. • Explain the fundamental principles of emissions reporting and outline information that needs to be incorporated within the GHG inventory report. • Discuss how to Interpret various emissions data and understand the global trends in GHG reporting. • Explain the concept of materiality and apply it in the reporting process. • Explain how to Disclose GHG emission inventory data as per various standards, frameworks,	• Show how to perform Carbon Footprint Calculation for a product, service, or process Using carbon footprint calculation tools or software • Show how to Implement various criteria in the process of verification of GHG emissions to ensure accuracy and reliability. • Show how to perform Reporting and Communication of Greenhouse Gas Data through: - Creating a greenhouse gas inventory report - Presenting carbon footprint results effectively - Communicating climate-related information to stakeholders • Show how to Analyse case studies to understand real-world examples of target setting and apply lessons learned to their own contexts.

and platforms for transparent and comprehensive reporting • Explain how to design short-term or long-term targets for GHG emissions reduction based on best practices and considerations. • Explain how to Identify and implement various methodologies under different international frameworks for setting GHG emissions reduction targets.	
Classroom Aids	
Laptop, white board, marker, projector, charts	
Tools, Equipment and Other Requirements	
1. Access to a computer or laptop with internet connectivity 2. Microsoft Office suite (Word, Excel, PowerPoint) 3. Web conferencing software for virtual discussions and presentations (e.g., Zoom, Microsoft Teams)	

Module 4: Business Responsibility and Sustainability Reporting (BRSR)

Mapped to: SGJ/MCr-0001 GHG Accounting and Sustainability Reporting, v1.0

Terminal Outcomes:

- Application of Sustainability Reporting Principles
- Develop and Understanding of Business Responsibility Reporting (BRR) and Business Responsibility and Sustainability Reporting (BRSR) and its application
- Develop a Comprehensive Understanding of BRSR Structure to Navigate and Apply BRSR Guidelines
- Understanding the Linkage and Differences between BRSR and International Frameworks and the Importance of Independent Third-Party Assurance

Duration: 04:00 hours	Duration: 03:30 hours
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
• Explain the rationale for businesses to report on their sustainability efforts, and recognize how incorporating sustainability practices can contribute to environmental and social sustainability. • Describe what is Business Responsibility and Sustainability Reporting (BRSR), outline its key stakeholders, and how to assess requirements & interpret the principles of BRSR. • Explain how to comply with the national standards guiding Indian companies in their sustainability efforts. • Differentiate between the earlier BRR and the BRSR framework • Explain how to Assist businesses in integrating sustainability considerations into their operational processes. • Identify the specific disclosure requirements for each section of the BRSR report. • Explain how to develop a comprehensive Business Responsibility and Sustainability Report. • Explain National Guidelines on Responsible Business Conduct principles and how to assess and link a company's ESG performance with that. • Discuss how to conduct a thorough analysis of gaps in BRSR reports to ensure compliance	• Outline the key mandate for BRSR reporting and show how companies can comply with it. • Show how to Perform a Case study analysis based on BRSR process and requirements • Show how to apply key concepts such as lifecycle assessment, waste management, resettlement plans, and their relevance to BRSR reporting. • Show how to Familiarize with relevant frameworks and standards for conducting third-party assurance of BRSR reports, or other applicable guidelines. • Show how to apply the key principles, criteria, and indicators used in these frameworks to assess sustainability performance of a company • Show the step-by-step process involved in conducting third-party assurance for BRSR reports. • Outline planning, scoping, and risk assessment stages of the assurance process • Show how to outline practical insights into data collection, verification, and

• Discuss how to incorporate the Sustainable Development Goals into BRSR reports • Explain how to recognize the frameworks, guiding principles, and connections of global reporting to BRSR. • Explain the importance of assuring corporate sustainability disclosures to gain understanding of the requirements and methodology involved in the assurance process	analysis techniques used during assurance engagements.
Classroom Aids	
Laptop, white board, marker, projector, charts	
Tools, Equipment and Other Requirements	
1. Access to a computer or laptop with internet connectivity 2. Microsoft Office suite (Word, Excel, PowerPoint) 3. Web conferencing software for virtual discussions and presentations (e.g., Zoom, Microsoft Teams)	

Annexure

Trainer Requirements

Trainer Prerequisites						
Minimum Educational Qualification	Specialization	Relevant Industry Experience		Training Experience		Remarks
		Years	Specialization	Years	Specialization	
Post Graduate in Science, Management, Engineering, Economics or any other relevant discipline Or Bachelors in Sciences, Economics Engineering or a related field	In-depth knowledge of climate change science, policies, and mitigation/adaptation strategies Familiarity with international climate agreements and their implications	2 years	Work experience in climate change, GHG accounting, sustainability reporting, or related areas. Or Experience in conducting GHG inventories, emissions calculations, and sustainability assessments	2 Years	Experience in delivering training programs on climate change, GHG accounting, and sustainability reporting Or Experience in designing and delivering comprehensive training modules on climate change, GHG accounting, and sustainability reporting	Trainers having either of the experience will be preferred
	Excellent communication and presentation skills Familiarity with carbon footprinting, emissions reduction strategies, and carbon offsetting	3 years	Or Demonstrated knowledge of sustainability reporting frameworks and guidelines (e.g., GRI, SASB, TCFD, BRSR)	3 Years	Or Experience in conducting workshops, seminars, and capacity-building programs for diverse audiences	
Certified under relevant Craft Instructor Training Scheme (CITS) course						

Trainer Certification	
Domain Certification	Platform Certification
"GHG Accounting and Sustainability Reporting", "SGJ/MCr-0001, v1.0", Minimum accepted score is 80%	"Recommended that the Trainer is certified for the Job Role: "Trainer (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2601, v2.0". Minimum accepted score is 80%"

Assessor Requirements

Trainer Prerequisites						
Minimum Educational Qualification	Specialization	Relevant Industry Experience		Training Experience		Remarks
		Years	Specialization	Years	Specialization	
Post Graduate in Science, Management, Engineering, Economics or any other relevant discipline	In-depth knowledge of climate change science, policies, and mitigation/adaptation strategies Familiarity with international climate agreements and their implications Excellent communication and presentation skills	5 years	Climate change, GHG accounting, sustainability reporting, or related areas			
Bachelors in Sciences, Economics Engineering or a related field	Familiarity with carbon footprinting, emissions reduction strategies, and carbon offsetting	6 years	Climate change, GHG accounting, sustainability reporting, or related areas			
Certified under relevant Craft Instructor Training Scheme (CITS) course						

Assessor Certification	
Domain Certification	Platform Certification
"GHG Accounting and Sustainability Reporting", "SGJ/MCr-0001, v1.0", Minimum accepted score is 80%	"Recommended that the Assessor is certified for the Job Role: "Assessor (VET and Skills)", mapped to the Qualification Pack: "MEP/Q2701, v2.0". Minimum accepted score is 80%"

Assessment Strategy

This section includes the processes involved in identifying, gathering and interpreting information to evaluate the learner on the required competencies of the program.

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDSM/SID or email
- Assessment agencies send the assessment confirmation to VTP/TC looping SCGJ
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SCGJ monitors the assessment process & records

2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

3. Assessment Quality Assurance levels / Framework:

- Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- Questions are mapped with NOS and PC
- Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Center photographs with signboards and scheme specific branding

- Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

5. Method of verification or validation:

- Surprise visit to the assessment location
- Random audit of the batch
- Random audit of any candidate

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

References

Glossary

Term	Description
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended); trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training .
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module . A set of terminal outcomes help to achieve the training outcome.
