SGJ/Q0121: Green Hydrogen Plant Entrepreneur

Brief Job Description

Green Hydrogen Plant Entrepreneur would identify the potential market and the client needs/requirements to propose the right kind of technically and economically feasible solution to set up green hydrogen plant. He/she is also expected to undertake specific works/sub component installations of a green hydrogen plant.

Personal Attributes

This job role requires the individual to be diligent, punctual, attentive and accountable to complete the work at site safely and timely. The individual shall also have an ability to take initiative, handle pressure and shall be motivated with good interpersonal and problem solving skills. The individual shall also be organized with the work and act with integrity while performing multiple tasks for quality and timely deliverables.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [SGJ/N1817: Introduce green hydrogen value chain for entrepreneurs](#)
2. [SGJ/N4101: Identify key components of Green Hydrogen Plant and its overall layout](#)
3. [SGJ/N1818: Acquire key technical and entrepreneurial skills for green hydrogen production](#)
4. [SGJ/N1820: Oversee the Assembly, storage and O&M of Electrolyzer for Green Hydrogen Production](#)
5. [SGJ/N1819: Diversify Micro-entrepreneurship skills in Green Hydrogen](#)
6. [DGT/VSQ/N0103: Employability Skills \(90 Hours\)](#)
7. [SGJ/N0802: Maintain Health & Safety at Green Hydrogen generation project site](#)

SGJ/N1817: Introduce green hydrogen value chain for entrepreneurs

Description

This unit outlines the fundamental concepts on green hydrogen business for entrepreneurs

Scope

The scope covers the following :

- Basics of Green Hydrogen
- Evolving Opportunities in segment

Elements and Performance Criteria

Basics of Green Hydrogen

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss the properties and characteristics of Hydrogen
- PC2.** Discuss various colour code nomenclature of Hydrogen and role of Green Hydrogen in sustainable energy transition.
- PC3.** Discuss key aspects related to production, storage and transportation of Green Hydrogen.
- PC4.** Demonstrate with chart colour code nomenclature of Hydrogen
- PC5.** Perform an activity for matching the process and source of production of different colour codes of hydrogen
- PC6.** Discuss key aspects of the hydrogen economy
- PC1.** Draw a flow diagram of green hydrogen production and illustrate potential end uses across the energy system
- PC7.** Discuss briefly the applications of Green hydrogen in industry, transport and power production

Evolving Opportunities in segment

To be competent, the user/individual on the job must be able to:

- PC9.** Identify opportunities for supplying various renewable energy for green hydrogen generation
- PC10.** Illustrate emerging opportunities for setting up enterprises across Green Hydrogen value chain
- PC11.** Discuss the role and responsibilities of a Green Hydrogen Plant Entrepreneur

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge of required process in green hydrogen generation
- KU2.** Green hydrogen domain knowledge
- KU3.** legislative, organizational, site requirements and technical procedures related to green hydrogen domain
- KU4.** customer relationship management principles

KU5. renewable energy and green hydrogen market

KU6. key concerns and opportunities in green hydrogen business landscape

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to read and correctly interpret info from different sources- books screens in machines and signage
- GS2.** understand the various color codes, as per standard electrical, mechanical and civil nomenclature.
- GS3.** to clearly communicate installation and design instructions to team
- GS4.** manage relationships with customers
- GS5.** choose best methods to complete assigned tasks
- GS6.** apply domain knowledge, observations and data to select course of action to perform tasks related to green hydrogen generation

Assessment Criteria

SGJ/N4101: Identify key components of Green Hydrogen Plant and its overall layout

Description

This unit outlines the key components of a Green Hydrogen production plant and the overall plant layout

Scope

The scope covers the following :

- Key components of the plant

Elements and Performance Criteria

Key components of the plant

To be competent, the user/individual on the job must be able to:

- PC1.** Identify all key components of the Green Hydrogen plant including electrical, mechanical and civil components
- PC2.** Illustrate the schematic of Green hydrogen production plant
- PC3.** Discuss functions of the key components of electrolyzer stack, renewable power plant, feed water supply unit, gas separator, transformer and rectifier, gas compression unit, etc.
- PC4.** Illustrate key components of the plant and outline their functions through plant schematics
- PC5.** Illustrate possible combination of various renewable power sources including for providing round the clock power for generating green hydrogen
- PC6.** Explain the overall layout of the plant
- PC7.** Illustrate how to interpret the Plant Layout including various equipment and material used in a Green hydrogen production facility.
- PC8.** Show how to read and interpret various electrical codes, data sheet, safety features etc relevant to the plant.
- PC9.** Discuss working principles of main components including electrolyzer stack, gas separator, power source, etc.,
- PC10.** Discuss key safety aspects to be considered while preparing the layout of hydrogen production plant for prevention from fire caused by sparking, e.g. to ensure safe distance of hydrogen from electrical devices like MCBs, switches.
- PC11.** Show how to perform Proper earthing of mainly the tools to safeguard against static charge
- PC12.** Discuss and illustrate key technical insights of Green hydrogen system for setting up and running successful enterprises
- PC13.** Discuss and show how to perform SWOT analysis for outlining key business opportunities in the value chain

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** to identify the functions of key components of hydrogen generation system and related process
- KU2.** efficiency, cost and typical specifications, functioning and operating principle of key components
- KU3.** government and regulatory requirement of green hydrogen business space
- KU4.** risk associated with green hydrogen business landscape
- KU5.** legislative, organizational, site requirements and related technical procedures

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** plan and organize work to meet deadlines
- GS2.** recognize problems and provide solutions
- GS3.** support the team in scheduling tasks
- GS4.** analyze critical points in day to day tasks and identify measures to provide solutions
- GS5.** prepare documentation as per relevant industry standards
- GS6.** manage relationships with customers and other stakeholders with intent on satisfying its requirements for service delivery

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Key components of the plant</i>	30	20	-	-
PC1. Identify all key components of the Green Hydrogen plant including electrical, mechanical and civil components	4	1	-	-
PC2. Illustrate the schematic of Green hydrogen production plant	-	3	-	-
PC3. Discuss functions of the key components of electrolyzer stack, renewable power plant, feed water supply unit, gas separator, transformer and rectifier, gas compression unit, etc.	4	2	-	-
PC4. Illustrate key components of the plant and outline their functions through plant schematics	2	2	-	-
PC5. Illustrate possible combination of various renewable power sources including for providing round the clock power for generating green hydrogen	-	2	-	-
PC6. Explain the overall layout of the plant	3	-	-	-
PC7. Illustrate how to interpret the Plant Layout including various equipment and material used in a Green hydrogen production facility.	-	2	-	-
PC8. Show how to read and interpret various electrical codes, data sheet, safety features etc relevant to the plant.	3	2	-	-
PC9. Discuss working principles of main components including electrolyzer stack, gas separator, power source, etc.,	3	-	-	-
PC10. Discuss key safety aspects to be considered while preparing the layout of hydrogen production plant for prevention from fire caused by sparking, e.g. to ensure safe distance of hydrogen from electrical devices like MCBs, switches.	3	-	-	-
PC11. Show how to perform Proper earthing of mainly the tools to safeguard against static charge	1	2	-	-

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC12. Discuss and illustrate key technical insights of Green hydrogen system for setting up and running successful enterprises	3	2	-	-
PC13. Discuss and show how to perform SWOT analysis for outlining key business opportunities in the value chain	4	2	-	-

SGJ/N1818: Acquire key technical and entrepreneurial skills for green hydrogen production

Description

This unit outlines how to acquire all key technical and entrepreneurial skills required for managing green hydrogen generation

Scope

The scope covers the following :

- Acquiring key skills

Elements and Performance Criteria

Acquiring key skills

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss process for setting up hydrogen production plant including required registration, availing low cost financing from Financial Institutions/Venture Capital/Banks, government subsidies, green power, free wheeling/banking of renewable energy etc.
- PC2.** Show how to access required data and analyse key information for performing site survey for installation of Hydrogen generation plant
- PC3.** Identify different players involved in value chain for hydrogen production for component supply and human resources
- PC4.** Discuss various evolving opportunities for setting up of hydrogen production plants at different sites, technologies, services, finance and market ecosystem
- PC5.** Discuss how to identify the key ingredients of business plan for land, water, renewable energy, finance, technology and market mechanism
- PC6.** Discuss all key aspects of a Detailed Project Report (DPR) and show how to develop a bankable DPR for Hydrogen production plant which includes market demand, storage, technology and finance for hydrogen production
- PC7.** Show how to Identify various approvals and clearances requirement
- PC8.** Demonstrate how system installation cost can vary depending upon the site conditions and related requirements
- PC9.** Discuss how to assess the potential and demand of Hydrogen in different sectors i.e. transport, power, building, industry, etc.
- PC10.** Show how O&M related cost for the system can be calculated
- PC11.** Show how available incentives/subsidy etc. can be availed for setting-up of a Hydrogen production plant
- PC12.** Show how to Calculate lifecycle cost of Hydrogen production plant along with its business viability including cash flow, annual savings and payback period
- PC13.** Discuss various parameters for calculating lifecycle cost of hydrogen production, storage system, along with cash flow, annual savings, payback period, IRR, inflation, increase in fossil fuel cost, sensitivity analysis by varying costs of renewable energy, water, man power, and such other factors etc. and how to include those in the detailed project report (DPR)

- PC14.** Identify opportunities in using green finance to encourage compliance with green hydrogen certification as per global standards
- PC15.** Identify opportunities with evolving business models in trading hydrogen as an energy commodity
- PC16.** Discuss key aspects to successfully install, operate, safely store and market Hydrogen as an energy source
- PC17.** Discuss O&M related cost for the system along with key aspects of Annual Maintenance Contract (AMC) of electrolyser from supplier/ manufacturers, and other systems
- PC18.** Explain different taxation and related compliances to setting up and operations
- PC19.** Discuss National Green Hydrogen policy and corresponding incentives/subsidies available and procedures for availing the same and explain how evolving start-ups and new ventures boost-up hydrogen economy
- PC20.** Identify new and evolving business opportunities for collaborating with renewable power developers, EPC, system integrators, manufacturers along with downstream application segments
- PC21.** Explain and Demonstrate how to use relevant reporting and measurement tool for renewable generation/power consumption for hydrogen generation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** government/corporate policies and guidelines on: workplace safety, identification and mitigation of safety hazards, work procedures and SOPs on green hydrogen generation
- KU2.** document information using appropriate corporate forms
- KU3.** typical specifications, functioning, operating principle and efficiencies of different types of components for green hydrogen generation
- KU4.** legislative, organizational, site requirements and technical procedures

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare documentation as per relevant industry standards
- GS2.** present information in a logical and organized way
- GS3.** take decision with systematic course of actions and/or response
- GS4.** read and interpret data from various sources
- GS5.** apply wide range of factual and theoretical knowledge to select the right course of action to perform tasks related to green hydrogen business landscape
- GS6.** use acquired knowledge of the process for identifying and handling issues
- GS7.** follow organisational code of conduct

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Acquiring key skills</i>	40	60	-	-
PC1. Discuss process for setting up hydrogen production plant including required registration, availing low cost financing from Financial Institutions/Venture Capital/Banks, government subsidies, green power, free wheeling/banking of renewable energy etc.	2	4	-	-
PC2. Show how to access required data and analyse key information for performing site survey for installation of Hydrogen generation plant	-	4	-	-
PC3. Identify different players involved in value chain for hydrogen production for component supply and human resources	-	5	-	-
PC4. Discuss various evolving opportunities for setting up of hydrogen production plants at different sites, technologies, services, finance and market ecosystem	3	-	-	-
PC5. Discuss how to identify the key ingredients of business plan for land, water, renewable energy, finance, technology and market mechanism	3	2	-	-
PC6. Discuss all key aspects of a Detailed Project Report (DPR) and show how to develop a bankable DPR for Hydrogen production plant which includes market demand, storage, technology and finance for hydrogen production	3	3	-	-
PC7. Show how to Identify various approvals and clearances requirement	-	3	-	-
PC8. Demonstrate how system installation cost can vary depending upon the site conditions and related requirements	-	3	-	-
PC9. Discuss how to assess the potential and demand of Hydrogen in different sectors i.e. transport, power, building, industry, etc.	3	1	-	-
PC10. Show how O&M related cost for the system can be calculated	-	4	-	-

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC11. Show how available incentives/subsidy etc. can be availed for setting-up of a Hydrogen production plant	2	4	-	-

SGJ/N1820: Oversee the Assembly, storage and O&M of Electrolyzer for Green Hydrogen Production

Description

This unit outlines how to Oversee the Assembly and storage of Hydrogen generation system along with the O&M of Electrolyzers

Scope

The scope covers the following :

- Oversee process operations

Elements and Performance Criteria

Oversee process operations

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss the Electrolyser Type (PEM, AE, SOEC)
- PC2.** Explain the technical specification of Electrolyser (PEM, AE and SOEC)
- PC3.** Explain the concept, and Operation of PEM and AE and SOEC electrolyser. along with demonstrate the functions of various types of electrolyzers through pictures, videos, etc
- PC4.** Discuss and illustrate differences in PEM, AE and SOEC Electrolysers types
- PC5.** Discuss Comparison between electrolyzers types with reference to the life, cost, efficiency, electricity consumption etc.
- PC6.** Draw detailed schematic of different Electrolyzers
- PC7.** Discuss the Tools required for Installation, dismantling, removal of components of PEM and AE /Alkaline water electrolyzers.
- PC8.** Explain the inputs / outputs of Electrolyzer
- PC9.** Discuss and illustrate in detail the input renewable power from various sources and its integration with electrolyser
- PC10.** Discuss how to oversee the Installation of Parts and Components of Electrolyser
- PC11.** Discuss and outline step by step process for Installation of Electrolyser
- PC12.** Explain the Challenges associated with Hydrogen in storage, handling and transportation
- PC13.** Discuss and show how to select and install hydrogen compression and storage system
- PC14.** Discuss and identify the precautions measures required to compress and store hydrogen
- PC15.** Discuss the safety guidelines to be followed as per industry standard
- PC16.** Perform activities to consolidate information on procurement cost of different components with make of any type of Electrolyzer along with anlyse technical specification sheet

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislative, organizational, site requirements and technical procedures for installation of green hydrogen generation system
- KU2.** typical specifications, functioning, operating principle and efficiencies of different components of green hydrogen generation system
- KU3.** key parameters associated with green hydrogen system
- KU4.** documentation parameters
- KU5.** identify the installation process and functions of key components
- KU6.** risks associated with green hydrogen projects

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read warnings, instructions and other text material on product labels, components etc.
- GS2.** interact with workers and other stakeholders in order to coordinate work processes
- GS3.** follow code of conduct
- GS4.** tools & tackles required for installation
- GS5.** occupational health and safety (OHS) standards and associated risks when working at green hydrogen site
- GS6.** typical specifications, costs, functioning, installation procedures, operation and maintenance principles, handling procedures and warranties of green hydrogen generation system

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Oversee process operations</i>	20	30	-	-
PC1. Discuss the Electrolyser Type (PEM, AE, SOEC)	2	-	-	-
PC2. Explain the technical specification of Electrolyser (PEM, AE and SOEC)	1	-	-	-
PC3. Explain the concept, and Operation of PEM and AE and SOEC electrolyser. along with demonstrate the functions of various types of electrolyzers through pictures, videos, etc	2	4	-	-
PC4. Discuss and illustrate differences in PEM, AE and SOEC Electrolysers types	1	3	-	-
PC5. Discuss Comparison between electrolyzers types with reference to the life, cost, efficiency, electricity consumption etc.	1	2	-	-
PC6. Draw detailed schematic of different Electrolyzers	-	3	-	-
PC7. Discuss the Tools required for Installation, dismantling, removal of components of PEM and AE /Alkaline water electrolyzers.	2	3	-	-
PC8. Explain the inputs / outputs of Electrolyzer	1	-	-	-
PC9. Discuss and illustrate in detail the input renewable power from various sources and its integration with electrolyser	2	3	-	-
PC10. Discuss how to oversee the Installation of Parts and Components of Electrolyser	2	2	-	-
PC11. Discuss and outline step by step process for Installation of Electrolyser	2	3	-	-
PC12. Explain the Challenges associated with Hydrogen in storage, handling and transportation	1	-	-	-
PC13. Discuss and show how to select and install hydrogen compression and storage system	1	3	-	-

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC14. Discuss and identify the precautions measures required to compress and store hydrogen	1	-	-	-
PC15. Discuss the safety guidelines to be followed as per industry standard	1	1	-	-

SGJ/N1819: Diversify Micro-entrepreneurship skills in Green Hydrogen

Description

This unit outlines how to identify entrepreneurial opportunities across Green hydrogen value chain

Scope

The scope covers the following :

- Micro-entrepreneurship

Elements and Performance Criteria

Micro-entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC1.** Discuss micro-entrepreneurship opportunities for water quality check and an Uninterrupted quality water supply for electrolyzer
- PC2.** Discuss and outline micro-entrepreneurship opportunities for Installation and commissioning of electrolyzers
- PC3.** Discuss and identify micro-entrepreneurship opportunities in Renewable energy power supply arrangement plant for green hydrogen plant
- PC4.** Discuss micro-entrepreneurship opportunities in storage of green hydrogen
- PC5.** Discuss micro-entrepreneurship opportunities in Installation of pipelines in green hydrogen plant/industry and Safe transportation of green hydrogen to consumers
- PC6.** Discuss micro-entrepreneurship opportunities in Handling of salt enriched water from water feed input system, (if required, depending on the type of electrolyser)
- PC7.** Discuss micro-entrepreneurship opportunities in Operation and Maintenance along with Managing safety of the plant
- PC8.** Discuss micro-entrepreneurship opportunities in leakage monitoring, purging of hydrogen by CO₂/NH₃ etc
- PC9.** Illustrate and Demonstrate opportunities for potential micro-entrepreneurship in all the key segments in green hydrogen sector
- PC10.** Explain how to Identify entrepreneurial opportunities for inspecting the Green hydrogen production system facility, perform equipment's, product and marketing documentation, quality control, process validation, verify the procedures and records related to the activities of the manufacturing unit
- PC11.** Discuss and Identify opportunities in labelling/certification for green hydrogen generators and facilitating them comply with relevant standards and regulations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislative, organizational, site and environmental requirements and technical procedures of green hydrogen generation
- KU2.** different risks associated with the project like cost over-run, project completion risk, etc

- KU3.** preparation of an activity implementation plan for green hydrogen generation
- KU4.** safety precautions to be taken
- KU5.** preparation of preventive maintenance schedule for different components
- KU6.** customer relationship
- KU7.** government policies and subsidies for green hydrogen projects
- KU8.** to identify the functions of key components

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read various color codes, as per standard electrical, mechanical and civil nomenclature
- GS2.** lead a team or group of technicians and plan and organize service work to meet deadlines
- GS3.** manage relationships with customers with intent on satisfying its requirements for service delivery
- GS4.** plan to utilize time and equipment's effectively
- GS5.** prepare and maintain documentation
- GS6.** respond appropriately to any queries
- GS7.** take decision with systematic course of actions and/or response

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Micro-entrepreneurship</i>	60	40	-	-
PC1. Discuss micro-entrepreneurship opportunities for water quality check and an Uninterrupted quality water supply for electrolyzer	6	-	-	-
PC2. Discuss and outline micro-entrepreneurship opportunities for Installation and commissioning of electrolyzers	6	8	-	-
PC3. Discuss and identify micro-entrepreneurship opportunities in Renewable energy power supply arrangement plant for green hydrogen plant	6	8	-	-
PC4. Discuss micro-entrepreneurship opportunities in storage of green hydrogen	6	-	-	-
PC5. Discuss micro-entrepreneurship opportunities in Installation of pipelines in green hydrogen plant/industry and Safe transportation of green hydrogen to consumers	6	-	-	-
PC6. Discuss micro-entrepreneurship opportunities in Handling of salt enriched water from water feed input system, (if required, depending on the type of electrolyser)	6	-	-	-
PC7. Discuss micro-entrepreneurship opportunities in Operation and Maintenance along with Managing safety of the plant	6	-	-	-
PC8. Discuss micro-entrepreneurship opportunities in leakage monitoring, purging of hydrogen by CO ₂ /NH ₃ etc	6	-	-	-
PC9. Illustrate and Demonstrate opportunities for potential micro-entrepreneurship in all the key segments in green hydrogen sector	2	8	-	-
PC10. Explain how to Identify entrepreneurial opportunities for inspecting the Green hydrogen production system facility, perform equipment's, product and marketing documentation, quality control, process validation, verify the procedures and records related to the activities of the manufacturing unit	5	8	-	-

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks

DGT/VSQ/N0103: Employability Skills (90 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** understand the significance of employability skills in meeting the current job market requirement and future of work
- PC2.** identify and explore learning and employability relevant portals
- PC3.** research about the different industries, job market trends, latest skills required and the available opportunities

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

- PC4.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC5.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC6.** recognize the significance of 21st Century Skills for employment
- PC7.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

PC8. adopt a continuous learning mindset for personal and professional development

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC9. use basic English for everyday conversation in different contexts, in person and over the telephone

PC10. read and understand routine information, notes, instructions, mails, letters etc. written in English

PC11. write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

PC12. identify career goals based on the skills, interests, knowledge, and personal attributes

PC13. prepare a career development plan with short- and long-term goals

Communication Skills

To be competent, the user/individual on the job must be able to:

PC14. follow verbal and non-verbal communication etiquette while communicating in professional and public settings

PC15. use active listening techniques for effective communication

PC16. communicate in writing using appropriate style and format based on formal or informal requirements

PC17. work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC18. communicate and behave appropriately with all genders and PwD

PC19. escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC20. identify and select reliable institutions for various financial products and services such as bank account, debit and credit cards, loans, insurance etc.

PC21. carry out offline and online financial transactions, safely and securely, using various methods and check the entries in the passbook

PC22. identify common components of salary and compute income, expenses, taxes, investments etc

PC23. identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC24. operate digital devices and use their features and applications securely and safely

PC25. carry out basic internet operations by connecting to the internet safely and securely, using the mobile data or other available networks through Bluetooth, Wi-Fi, etc.

PC26. display responsible online behaviour while using various social media platforms

PC27. create a personal email account, send and process received messages as per requirement

PC28. carry out basic procedures in documents, spreadsheets and presentations using respective and appropriate applications

PC29. utilize virtual collaboration tools to work effectively

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC30.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC31.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC32.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC33.** identify different types of customers and ways to communicate with them
- PC34.** identify and respond to customer requests and needs in a professional manner
- PC35.** use appropriate tools to collect customer feedback
- PC36.** follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC37.** create a professional Curriculum vitae (Résumé)
- PC38.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC39.** apply to identified job openings using offline /online methods as per requirement
- PC40.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC41.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills and different learning and employability related portals
- KU2.** various constitutional and personal values
- KU3.** different environmentally sustainable practices and their importance
- KU4.** Twenty first (21st) century skills and their importance
- KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU6.** importance of career development and setting long- and short-term goals
- KU7.** about effective communication
- KU8.** POSH Act
- KU9.** Gender sensitivity and inclusivity
- KU10.** different types of financial institutes, products, and services
- KU11.** components of salary and how to compute income and expenditure
- KU12.** importance of maintaining safety and security in offline and online financial transactions
- KU13.** different legal rights and laws
- KU14.** different types of digital devices and the procedure to operate them safely and securely
- KU15.** how to create and operate an e- mail account

- KU16.** use applications such as word processors, spreadsheets etc.
- KU17.** how to identify business opportunities
- KU18.** types and needs of customers
- KU19.** how to apply for a job and prepare for an interview
- KU20.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence in English and other languages
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all to maintain effective work relationship
- GS4.** how to work in a virtual mode, using various technological platforms
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Introduction to Employability Skills</i>	1	1	-	-
PC1. understand the significance of employability skills in meeting the current job market requirement and future of work	-	-	-	-

SGJ/N0802: Maintain Health & Safety at Green Hydrogen generation project site

Description

This unit outlines how to perform Health and Safety measures at the Green Hydrogen generation facility

Scope

The scope covers the following :

- Safe work area

Elements and Performance Criteria

Safe work area

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the requirements for safe work area at hydrogen generation project site
- PC2.** Explain the importance of Occupational health & Safety standards and regulations for Basic considerations for the safety of hydrogen systems
- PC3.** Explain the importance of administering first aid and Demonstrate how to administer first aid
- PC4.** Demonstrate the usage of personal protective equipment for ensuring safety during installation and O&M work
- PC5.** Describe potential causes of emergency such as gas leaks, fire, explosion, bomb threatening, natural calamities etc
- PC6.** Demonstrate the use of fire extinguishers, fire detection and alarm system
- PC7.** Discuss importance of different detectors and safety tools
- PC8.** Show how to comply with all applicable statutory requirements along with safety regulations in terms of fire protection.
- PC9.** Review the Material Safety Data Sheet and labels of chemicals contained in cylinders in order to be aware of their hazards and precautionary measures
- PC10.** Demonstrate how to follow necessary and adequate safety measures including personal protective equipment and precautions to avoid any accident at hydrogen generation site
- PC11.** Explain need to maintain ideal temperature and humidity level of storage areas used to safely contain gas cylinders
- PC12.** Discuss how to Utilize sensors that can alert the responsible person such as a safety officer when storage rooms are not maintaining the ideal conditions for storing hazardous chemicals
- PC13.** Identify the personal protective equipment used for the specific purpose.
- PC14.** Demonstrate how to follow necessary and adequate safety measures including personal protective equipment and precautions to avoid any accident at hydrogen generation site
- PC15.** Identify the hazards associated with hydrogen generation system
- PC16.** Identify work safety procedures and instructions for working at hydrogen generation plant complying with applicable safety regulations
- PC17.** Discuss Mock testing of fire fighting system

- PC18.** Discuss all applicable statutory requirements along with safety regulations in terms of fire protection.
- PC19.** Show how to Incorporate good housekeeping practices and infection control guidelines.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** complete documentation work applicable to the role
- KU2.** work constructively and collaboratively with others
- KU3.** follow organization's rule-based decision making process
- KU4.** make timely decisions for efficient utilization of resources
- KU5.** read various color codes, as per standard electrical, mechanical and civil nomenclature
- KU6.** read and correctly interpret health and safety instructions and signage

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** obtain authorization from specified officials
- GS2.** legislative, organization, site requirements and technical procedures
- GS3.** usage and handling procedure related to safety of hydrogen generation equipment
- GS4.** importance of wearing protective clothing and other safety gear

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification will be created by the Sector Skill Council/Awarding Body. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC/AB will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC/AB.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at

each examination/ training center based on these criteria.

6. To pass the assessment, every trainee should score the Recommended Pass % aggregate for the Qualification.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Acronyms

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
